DexFix / Assembly tool.  
Small piece -  
great effect.

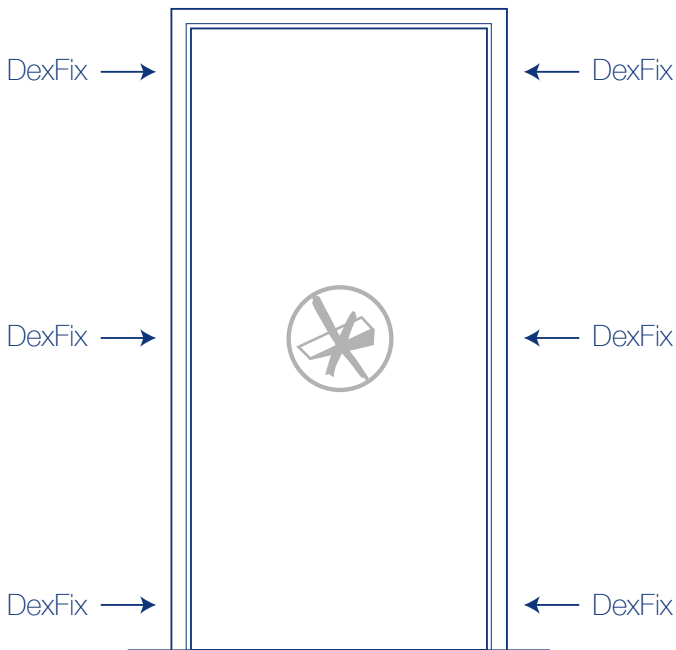

**DexFix**

The future of door frame installation is smart, small and extremely time-saving. The newly developed DexFix assembly tool by Svedex fulfils the requirements installers have during assembly. Easy handling, accurate assembly and shorter assembly time.

**DexFix**

Wooden wedges **no longer**  
needed during assembly.

Unique.  
Time-saving. DexFix.

### Time-saving.

- No bothersome fixing with wooden wedges.
- Save up to 25% in time during door frame assembly.

### Easy to use.

- Infinitely adjustable with a screwdriver.
- Quickly fastens the door frame in the required position.
- No wooden wedges required.

### Versatile.

- During door assembly.
- Permanent, dimensionally stable, pressure-resistant back lining.
- Can also be used in complicated areas.

3 x DexFix per frame side =  
6 pcs per frame, ideally positioned.

- Pre-assembled or supplied separately for you to attach or glue on.
- Clamping range of up to 40 mm.

Frame fixing takes place on the door leaf side of the frame, there where the force has to be absorbed.

- Torx 25 screwdriver or bit insert.
- Precise, simple and fast frame alignment.
